EDUCATION

New York University - Courant

Master of Science in Computer Science (AI/ML Concentration)

New York, USA

Aug. 2025 – Present

Pennsylvania State University

Bachelor of Science in Computer Science, Minor in Mathematics

Pennsylvania, USA

Aug. 2021 – May 2025

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript/TypeScript, SQL, R, C#, Swift, HTML/CSS, MATLAB

AI/ML: PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib, NLP, Deep Learning, LLMs/OpenAI APIs

DevTools: React, .NET, Angular, Node.js, Docker, Git, Firebase, MongoDB, PostgreSQL, REST APIs, Linux, Xcode

Cloud DevOps: AWS, Azure, Google Cloud, CI/CD, Agile

COURSES

Artificial Intelligence, Machine Learning, System Programming, Digital Design, Operating Systems, OOP with Web, Data Structures and Algorithms, Game Theory, Fundamental Algorithms, Computer Organization & Design

WORK EXPERIENCE

Graduate Course Assistant — Computer Programming

Sept. 2025 – Present

New York University

New York, USA

- Review 30+ code submissions each week, providing constructive feedback to support student learning.
- Host office hours and answer student questions to reinforce course material and troubleshoot programming errors.

Data Analytics (AI) Extern

May 2025 – Aug. 2025

Beats By Dre

Remote, USA

- Analyzed large-scale consumer data points using Python, GPT, and Claude, applying NLP techniques like sentiment analysis and topic modeling to identify emerging behavioral trends.
- Built AI-powered dashboards and predictive models to optimize marketing strategies, improving campaign ROI by 18% and streamlining reporting workflows.

Software Engineering Intern — Reliance Jio Platforms Ltd.

June 2024 – Aug. 2024

India's largest Telecommunications Industry

Mumbai, India

- Built secure, data-driven iOS modules in Swift integrating biometric authentication, encrypted storage, and backend APIs, supporting enterprise workflows for 10,000+ users and generating high-quality operational data for analytics and automation.
- Engineered real-time data pipelines using Firebase and Core Data to collect, synchronize, and process user activity and approval data, enabling operational dashboards and reducing workflow turnaround time by 25%.

RESEARCH EXPERIENCE

Next-Generation Reservoir Computing(NG-RC)

Feb. 2024 – March 2025

Pennsylvania State University

Pennsylvania, USA

- Translated Python algorithms into MATLAB, ensuring accurate replication of research results, by implementing NG-RC models with Dr. Yan Li for AI-driven forecasting of dynamical systems.
- Enhanced mathematical functions and optimized time-delay features, boosting forecasting accuracy by 15% and lowering runtime, through refining model structures and streamlining code.

PERSONAL PROJECTS

Medical Chatbot | Python, Pinecone, OpenAI API, Hugging Face, LLM

Apr. 2025 – Aug. 2025

- Built an LLM-powered medical QA system using OpenAI APIs and Pinecone, enabling semantic search across 500+ medical PDFs with sub-second retrieval.
- Designed an embedding + reranking pipeline using Hugging Face models, improving answer relevance by 30% compared to keyword search.

Face Emotion Recognition | Python, OpenCV, TensorFlow, Deep Learning

Aug. 2024 – Feb. 2025

- Trained a real-time facial emotion recognition model using CNNs in TensorFlow, achieving 90%+ accuracy on a curated six-emotion dataset.
- Reduced inference latency by optimizing OpenCV preprocessing and model size, enabling real-time performance on consumer hardware.
