EDUCATION

New York University - Courant

Master of Science in Computer Science (AI Concentration)

New York, USA

Aug. 2025 – Present

Pennsylvania State University

Bachelor of Science in Computer Science, Minor in Mathematics

Pennsylvania, USA

Aug. 2021 – May 2025

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript/TypeScript, SQL

AI/ML & GenAI: PyTorch, TensorFlow, Scikit-learn, NLP, Transformers, Hugging Face, Model Evaluation, Model Robustness, Large Language Models, RAG, Embeddings, Pinecone, FAISS, LangChain, OpenAI API, AI Agents, Prompt Engineering, Fine-tuning

Data & Cloud: Pandas, NumPy, FastAPI, REST APIs, Docker, Git, Linux, AWS, Azure

COURSES

Artificial Intelligence, Machine Learning, Natural Language Processing, Data Structures and Algorithms, Digital Design, Object-Oriented Programming, System Programming, Operating Systems, Computer Organization & Design

WORK EXPERIENCE

Software Engineering Intern

June 2026 – Aug. 2026

WONK Ledge Labs

New York, USA

- Instrumented the Gemini generation pipeline within a full-stack TypeScript platform to capture latency, token usage, and output length, identifying response size as the primary performance bottleneck.
- Designed feature-flagged experiments to isolate prompt-component costs, recommending context caching to reduce redundant token usage without sacrificing product functionality.

Data Analytics (AI) Extern

May 2025 – Aug. 2025

Beats by Dre

Remote, USA

- Deployed GPT- and Claude-based NLP pipelines using embeddings and topic modeling to analyze 200K+ customer reviews, selecting prompt-based inference to support faster and more adaptable experimentation.
- Built Python evaluation workflows using precision, recall, consistency checks, and error handling, reducing manual reporting effort by 40% while improving insight reliability across noisy text data.

Software Engineering Intern

June 2024 – Aug. 2024

Reliance Jio Platforms Ltd. – India's largest Telecommunications Industry

Mumbai, India

- Developed a production iOS application with biometric authentication, encrypted data flows, and low-latency API communication, supporting reliable data capture for 10K+ enterprise users.
- Optimized real-time synchronization through Firebase and Core Data, improving data reliability and reducing workflow turnaround time by 25% under concurrent usage.

RESEARCH EXPERIENCE

Research Assistant: Agent AI and Geospatial Simulation

Aug. 2026 – Present

Simspace, New York University

New York, USA

- Integrate agent-based AI into an immersive pedestrian simulation, enabling virtual agents to interpret position, orientation, surrounding environments, and nearby-agent activity in real time.
- Model context-aware decision logic that translates spatial and social cues into adaptive gestures, movements, and interactions, improving behavioral realism in virtual urban environments.

PERSONAL PROJECTS

Medical Chatbot | Python, Pinecone, OpenAI API, Hugging Face, LLM

Apr. 2025 – Aug. 2025

- Architected a deployed medical question-answering system using retrieval-augmented generation across 500+ clinical documents, providing current contextual evidence while reducing hallucination risk.
- Implemented document ingestion, embeddings, semantic retrieval, reranking, and low-confidence fallbacks, improving answer relevance by 30% while maintaining low-latency responses.

Face Emotion Recognition | Python, TensorFlow, OpenCV, CNN, Deep Learning

Aug. 2024 – Feb. 2025

- Trained a lightweight convolutional neural network for multiclass facial-emotion recognition, achieving 90%+ accuracy while supporting real-time inference on consumer hardware.
- Streamlined OpenCV preprocessing and addressed class imbalance through data preparation and model tuning, enabling stable predictions without increasing the deployment footprint.

Clubs: Tech@NYU, HackNY, Courant's Women in Computing (WINC), Society of Women in Engineering
